MITRAL ANNULAR CALCIFICATION AND SEVERITY OF CORONARY ARTERY DISEASE

Condition: New. Publisher/Verlag: LAP Lambert Academic Publishing | Detection, Evaluation, Correlation, Implication of Mitral Annular Calcification & Coronary artery Disease | Mitral Annular Calcification (MAC) is degenerative, fibrous calcification of the mitral valve support ring. It develops from progressive calcium deposition along and beneath the mitral valve annulus. It was shown to be an independent predictor of cardiovascular mortality and morbidity. MAC is a marker of increased cardiovascular risk. This increased risk occurs in a graded fashion by MAC severity. MAC is associated with several cardiovascular...
