Efficient Parameter Characterization for Hardening and Yield Locus Models for Sheet Metals

By Mustafa Seckin Aydin

Shaker Verlag Aug 2013, 2013. Buch. Book Condition: Neu. Neuware - Various mechanical tests performed under different loading conditions such as, biaxial stretching, tensile, shear, plane strain etc. are proposed to calibrate advanced constitutive models. Except for uniaxial tensile tests, these testing techniques are either expensive to be conducted or cumbersome to be evaluated. Furthermore, accuracy of these non-standardized tests is not guaranteed. This thesis presents three inverse identification concepts ensuring material characterization by necessitating simple tests conducted either solely on an ordinary tensile test machine or both on standard tensile and sheet metal testing devices. In this manner, the desired simulation quality is maintained in an economical manner by means of testing devices available in many industrial laboratories. In this dissertation, first of all, material characteristics of several steel grades from mild, high strength and advanced high strength categories were investigated with regard to rate dependency, hardening and yield locus shape by means of monotonic mechanical tests. Conducting uniaxial tensile tests with different machine speeds, a concept to model the impact of strain rates is proposed and implemented in user models incorporating Yld2000-2d (Barlat et al., 2003) and Yld2004-18p (Barlat et al., 2005) yield criteria. Shape evolution of yield...

Reviews

This composed book is excellent. This really is for all who statte that there had not been a worth reading through. Your life period will probably be change as soon as you total looking over this ebook.

-- **Cheyenne Barrows**

The book is fantastic and great. I have go through and i also am certain that i will planning to read through once more once more down the road. Its been printed in an exceedingly simple way and is particularly simply after i finished reading through this publication through which really changed me, change the way i think.
