## Linking Financial Distress with Capital Structure & Accounting Returns : A Study of Karachi Stock Exchange

By Sundas Khalid

LAP Lambert Academic Publishing Mrz 2018, 2018.

Taschenbuch. Condition: Neu. Neuware - The concerned study is quantitative in nature and depicts the research question that 'Does financial distress has any impact on Accounting Returns (ROA) and Leverage ' Our book has total nine variables in which there are two dependent variables of Accounting Returns (ROA) and Leverage. Financial Distress is independent variable. The Firm size, Tangibility, Profitability, Debt ratio, Market to Book ratio, and corporate tax rate before financing are control variables. Financial distress is measured by the model introduced by Achim (2012) as he had divided different financial statement ratios into four principal components. The profitability is further operationalized in to return on assets, return on equity and return on sales. This topic for research was selected just because numerous models for the prediction of financial distress have been introduced and a lot of work has been done on the prediction of financial distress of the firms but still the impact of financial distress on other variables like Accounting Returns (ROA) and Leverage etc has not been examined. 80 pp. Englisch.

### Reviews

*This composed ebook is wonderful. It really is written in basic words rather than hard to understand. You may like the way the writer compose this pdf.*

-- **Ryder Nolan**

*This book can be well worth a go through, and a lot better than other. It is written in simple words and phrases and not confusing. It's been printed in an exceptionally simple way in fact it is merely right after I finished reading through this pdf by which basically changed me, modify the way I think.*
